Report on "Vision X Color Detection"

"Being Me" is an initiative taken by Satish Pradhan Dnyanasadhana College for the coming five years which would focus on different social concerns such as LGBT, Divyangjan, Cervical Cancer, AIDS, PCOD, PSOS etc. This event will help stakeholders to recognise the strength of differently abled sections of our society.

Some of the **Primary Objectives** are:

- To change attitude of stakeholders towards sexuality stereotypes & to broaden the understanding about gender identity and equality
- To create awareness about gender specific health issues like AIDS, Cervical cancer and PCOD

- To help the unskilled working population in enhancing skill sets.
- To sensitize stakeholders towards issues of differently abled and to help in their empowerment.
- To sensitize stakeholders about the challenges faced by old age citizens and conduct programmes for their general wellbeing.

- To sensitize on above-mentioned objectives to FY students of 2022-2023, the Being Me committee organised **"Vision X Color Detection"** . This project is created by our TYBSC(Computer Science)student as resource person **Mr. Amey Bhobaskar To Sensitise the students to do Divyangjan Projects during final year.**

- This project basically knows about Color Blindness, so in Color Blindness we are unable to distinguish between certain colours like Red, Green, Yellow and Blue etc. According to an estimate there are 300 Million people in the world who are Colorblind and still increasing.

- So they all face the problems in their day to day life and Professional life also like they are unable to see traffic signals, colour of fruits and vegetables and other essential things, and in professionals in which the Correct colour recognition of colour is very important like Scientist, Pilots, Doctor, Electrician etc.

- The main objective of this project is solving the problem of colour blind people which they are facing in their day-to-day life and help them to live their life easier.

- And contributing in computer vision Technology which is used in self driving cars, to detect colours of Traffic lights, Traffic signs and Sign indicators. Multiple colour detection robots Used to perform pick and put tasks and Separation of different Coloured objects.
