Activity-2 Screening of Film Devi

1. Descriptive Report:

The Department of Business Economics organised a screening of the short movie on Women's Empowerment, "Devi " on 25/7/2022 intending to educate the young minds of students and to understand the importance of women's empowerment as well as empowerment of the society. The screening of the movie was done in the class during the lectures for all SYBCOM and TYBCOM students.

Objectives

The activity was undertaken with following objectives.

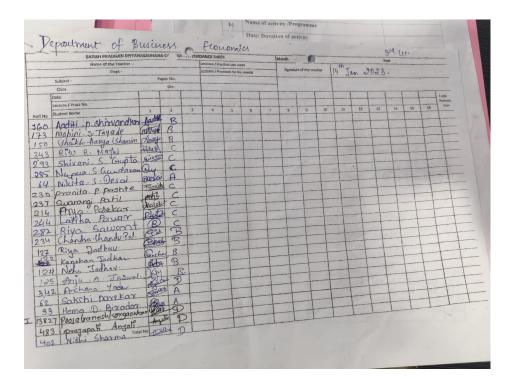

- 1. To make students understand the importance of "women empowerment" through the movie.
- 2. To make them understand the problem of women who suffer Domestic violence and abuse.

The movie was screened for all SYBCOM and TYBCOM students. After watching movies Students were requested to express their thoughts on the topic. There was a huge participation of students. We got a very sensible response from the students while expressing their thoughts as they mentioned in college they should be recognised as students and not as girls and boys. They also mentioned there should be equal opportunity in all spheres for all genders. We should promote more gender empowerment sessions and women should know about the safety measures. In class there was also a demonstration of some "Martial Arts" tricks by students who were teaching how to protect oneself in such a situation.

Students' responses gave us immense motivation to conduct more such activities in the future.

3. Attendance sheet:

The screening of the movie was done in the class during the lectures for all SYBCOM and TYBCOM students.
